DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 2, 2006 has been entered.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 8, 10, 12-14, 21-23, 25-27, 34-36 and 38-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Willey, US 2001/0008879 A1. The reference discloses photobleaching compositions comprising phthalocyanines (abstract). The compositions may further comprise about 0.1-10% of inorganic salts such as sodium chloride [0303] and peroxygen bleaches such as Oxone [0316]. Bleaching agents are typically present at about 1-30% [0313]. The compositions are adjusted to a pH of about 7-13 with buffers, such as carbonate or bicarbonate [0328]. Specific amounts of buffer are not disclosed, but determination of the buffering-effective amount of a disclosed buffer would amount to an ordinary expedient. Suitable surfactants are disclosed at [0305]+, and cosolvents at [0294]. This reference differs from the claimed subject matter

Art Unit: 1751

in that it does not disclose a composition which reads on applicant's claims with sufficient specificity to constitute anticipation.

It would have been obvious at the time the invention was made to make such a composition, because this reference teaches that all of the ingredients recited by applicants are suitable for inclusion in a bleaching composition. The person of ordinary skill in the surfactant art would expect the recited compositions to have properties similar to those compositions which are exemplified, absent a showing to the contrary.

In the case where the claimed ranges overlap or lie inside ranges disclosed by the prior art, a *prima facie* case of obviousness exists. *In re Wertheim*, 541 F.2d 257, 191 USPQ 90 (CCPA 1976); *In re Woodruff*, 919 F.2d 1575, 16 USPQ2d 1934 (Fed Cir. 1990).

Allowable Subject Matter

4. Claims 41-43 are allowed.
5. The following is an examiner's statement of reasons for allowance: The closest prior art of record is the reference relied upon above and the reference relied upon in the previous office action. The present reference does not make obvious the formulation of a compositions comprising sea water. The reference of the previous office action does disclose the use of sea water, but not the use of a carbonate or bicarbonate buffer in the recited amounts. Sea water does contain bicarbonate, but not in the amounts presently recited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
